ABSTRACT

This publication is comprised of six statistical tables. The costs for each geographical segment are broken down as to rural farm, rural nonfarm, and urban populations. The six tables are: 1. Costs for average child, 1960-61; 2. Costs for average child, 1970; 3. Costs for a child, by number of children, 1960-61; 4. Costs for a child, by number of children, 1970; 5. Index numbers of price change from base period to specified year; and 6. Cost-income relationship, 1960-61. (DB)

1/ Families include husband, wife, and specified number of children. Data for average child refer to families with no more than five children. Data by number of children were not computed for 1-child families and for the Northeast and the West.

2/ Average of first 18 years, weighted by number of children.

3/ Data for farm families in West omitted because of small size of sample.

Note: Data rounded to nearest \$10.
